

DRAEM - Pitch Presentation

A Discriminatively Trained Reconstruction Embedding for Surface Anomaly Detection

Christopher Roßbach¹

¹Friedrich-Alexander-Universität Erlangen-Nürnberg, Technische Fakultät

October 20, 2025

- **Fact:** How much surface anomaly is done automatically vs manually

¹ZKS21.

- **Why Surface Anomaly Detection Matters:**
 - ...
- **The Challenge:** Traditional methods struggle when anomalies are rare and diverse – we need smarter, data-efficient approaches!
